2 - Please comment on strengths and suggestions for improvement for Ilana Roberts Krumm -

Response Rate	10/11 (90.91%)
<ul style="list-style-type: none">• Ilana is an incredible teacher. I feel that I have gained a better understanding of pulmonary material. There is no way that I could have been successful with this material without her patience and passion for pulm. She meets our knowledge and helps grow on that. She reinforces me to be more confident in myself and my knowledge. She is a huge asset to UWSOM faculty.• Strengths: Very engaging; excellent at teaching and helping break down concepts into understandable bits! Suggestions: Keep on being amazing• You can tell she loves to teach, brought great energy every day, and gives clear explanations, does a good job checking for understanding (vs just explaining it once and moving on) One area potentially to improve: it's okay to say that an answer or a guess is just incorrect, sometimes its less confusing to be clear in that way and it's not necessarily discouraging!• Ilana is wonderful! I was so impressed by her expertise in the pulmonary subject matter. I would assume she was an attending with many years of pulmonary experience given how masterfully she was able to teach the material. She was so enthusiastic and clearly invested in our learning, and she was always so willing to rephrase explanations or present information in multiple ways until all of us understood the given topic. I really enjoyed small group with her and hope she returns for future students!• I like how Ilana used the board really well and made sure to highlight the key points. She would also research questions we had if she didn't know the answer.• Ilana was delightful as an instructor. She had prepared well for the class sessions and was an engaging small group leader. She is dedicated to the craft of medical education and I hope she will continue to hone her abilities in the future. A trait from Basak's teaching that I greatly enjoyed was her ability to tie the course material into what she was seeing or had seen in the hospital. I hope that Ilana will continue to do more of that in her teaching. It makes the concepts easier to remember. The baked goods were phenomenal and made small group feel more like a home.• Great teacher and I really appreciated the way she broke down explanations to solidify our understanding. She makes a really awesome team with Basak. Ilana is very knowledgeable and super nice, and also a great baker as well. Please continue to teach students & I hope the UW shows their appreciation to her!!!!• Dr. Krumm explained the pulmonary concepts very well and in ways that were easy for us to understand. I appreciate the use of analogies whenever possible to explain the concepts. Dr. Krumm was also very approachable which helped to create a safe learning space, and she and Dr. Coruh also worked together very well as a team. They both had similar energy levels and brought an enthusiasm to small group sessions that made these sessions more enjoyable.• Fantastic, high energy, very knowledgeable, nothing but good things to say about Ilana.• Dr. Krumm is an excellent teacher. She made us feel comfortable asking basic clarifying questions and is able to explain concepts in a really approachable and clear way. Her enthusiasm for this material is evident and I loved hearing about her clinical experiences that made this material feel important and relevant. Thank you Dr. Krumm for your wonderful teaching and the baked treats!
